| summary      | Interaction and Experience Designer with a research-oriented background in Human-Computer Interaction, XR and information visualization. My work investigates spatial and multimodal interfaces for accessing and constructing information, with a particular interest in temporal data and Human-AI interaction. I hold an MA in Interaction & Experience Design and have experience across academic research, prototyping and industry-oriented XR projects. |                         |

| selected projects | <div><a href="#">CHRONOTES - HCI / XR / Information Visualization</a> 2025</div> <div>ChroNotes is a design-driven toolset for managing evolving knowledge in industrial spatial computing environments. Extending the PROXIMA framework, it introduces temporal stratification and versioning of spatial information across VR, AR, and desktop interfaces, combining multimodal interaction, hand-tracking, information visualization, and AI-assisted content curation for contextual industrial knowledge management.</div> <div><a href="#">PHDBOT - Agentic research automation system</a> 2026</div> <div>Designed and iteratively developed an AI-assisted pipeline for discovering, extracting, evaluating and indexing PhD opportunities, integrating local models, persistent scheduling, checkpointing and database/vector-search infrastructure. PHDBOT is currently orchestrated through Valet, a custom governor for model routing, quota-aware execution, persistent agent state and cooperative task handoffs.</div> <div><a href="#">TW++ - Interactive Systems / GNOME Development</a> 2026</div> <div>TW++ is a GNOME Shell extension that redesigns task and workspace management through a compact, persistent widget integrated into the desktop environment. The project explores interaction patterns for quickly accessing, organizing, and monitoring tasks while respecting GNOME's native behaviors and visual language, combining UX iteration, system integration, and front-end implementation in a real-world desktop environment.</div> |                                                               |
